

## Density Populations (2010)

Ogden Dunes

1.4 square miles

.7 land

.7 water

Population 1100

1,798 population density

Dune Acre

3.5 square miles

2.1 land

1.4 water

Population 182

99 population density

Beverly Shores

5.8 square miles

3.6 land

2.3 water

Population 613

198 population density

When comparing Ogden Dunes to Beverly Shores and Dunes Acres, one must consider the vast differences in their population, population density and land mass. Ogden Dunes is almost 20 times more densely populated than Dune Acres and nine times more densely populated than Beverly Shores. The population density of Ogden Dunes makes it unsafe for the use of firearms or weapons.
