    - A. Review stone retaining wall standards for 152.200(B) (2)(d) Do not conform to the requirements of this chapter, or do not meet currently accepted architectural and engineering standards.
    - B. SECTION 04600 DRY STONE WALL RETAINING SYSTEM PART 16 GENERAL DESCRIPTION Work includes furnishing and installing a coursed dry stone retaining wall to be installed to the lines and grades designated on the project's final construction drawings or as directed by the Architect/Engineer. Included here are the standards of coursed dry stone wall construction, as they should be shown on the construction drawings. 1.03 DEFINITIONS:
      - a. Dry Stone Retaining Wall is a type of gravity wall It is built without any mortar, and relies on the mass of the stones and the friction between them to retain soil.
      - b. Terminology for Dry Stone Walls as used in these specifications:
        - i. Footing: The prepared surface on which the wall is built
        - ii. Foundation Stones: Large Stones in the bottom of the all, forming the first course.
        - iii. Lift: A portion of wall vertically above or below a course (See Attached.)
- A discussion about the above was lead by RR as to the addition of a Dry Stone Wall specification as referenced in 152.200. MF presented the need for such a standard. HC inquired as to the source of this Standard.
- MF charged the Code Review Committee to look into these types of standards for use as references.
